

Have you been diagnosed with

ME CFS

Are you bed-ridden and seriously ill with this terrible Dis-ease?

If this is you, or some-one you know, then I can help you. I have proven techniques that can help such sufferers return to normal living, free of the long-lasting effects of ME /CFS. The patient does not have to do anything – just lie in bed and get well! There is no exercise involved – no challenges to overcome.

This is a completely safe, natural, non-drug therapy and does not interfere with other clinician's advice or treatments. It works on the basis that all illness symptoms are a Process of the Mind i.e. mental, physiological, and biological; these symptoms therefore must have a cause. The specific talking therapy I have perfected enables me to find the cause and treat the problem properly by creating an automatic immune response.

This terrible illness will then no longer be a mystery and the patient will return to full health. Most importantly, I assure you that ME /CFS is not “all in the mind” as many sufferers are led to believe.

**Talking Cures are OFFERING THIS TREATMENT TO APPROPRIATE PATIENTS
FREE OF FEES.**

I am offering this treatment totally free of charge so that the therapy can be fully documented. It is not a trial, I have proven results, but full documentation is essential in order to validate this treatment to the medical professions and thus make it available to more people.

If you or someone you know would like to be rid of ME /CFS and are prepared to take part in this documentation and validation process, please contact etc.
