

I'd like to thank you for the lovely front garden you have. I thank you not only for myself but for the birds, bees and insects who no doubt enjoy it too!

In these days when so many people are paving over their front gardens, not only to make space for a car or two but to cut down on the work involved in maintaining a lawn and flower beds, it's a joy to see a spot where wildlife can flourish and where the natural world is allowed to breath.

Even though there is sometimes need for a hard surface to park a car, I've no doubt that the wildlife appreciate it when some green space is left for a tree, a bush or some flowers.

So, once again, thank you for your garden. It brings a smile to my face whenever I walk by!

By keeping your garden green and 'wildlife-friendly' you are ...

-  Helping to cut down pollutants in the atmosphere
-  Helping with drainage to prevent flooding
-  Playing a key role in reducing climate-changing Greenhouse gases
-  Providing an environment where bees and other wildlife can live and thrive.
-  Helping me to feel uplifted as I pass by!
